COMPACT WALK BEHIND SCRUBBER DRYERS FR 15 SERIES

FR 15 represents an important point of reference in the segment of compact scrubber dryers. Its modern design is able to guarantee personality, ergonomics and, most of all, compact dimensions to clean where other scrubber dryers cannot arrive or have difficulty. A functional aesthetics encompasses a top-notch technical solutions system: - Hybrid: the innovative system, only for Hybrid version, which combines power supply with battery power (lithium batteries up to 2 hours running time and 1 hour charging time) in order to guarantee the perfect mix between performance, working time and prolonged cleaning sessions; - The front knob over the brush head allows to adjust its angle of incidence, enabling FR 15 to perfectly adhere to the working surface in any situation and with any kind of accessories to give excellent results; - The practical external wheel allows to adjust the height of the head, avoiding overloads of the engine on "difficult" surfaces. In this way FR 15 is able to work everywhere without any problems. - The suction motor guarantees an excellent drying performance and today it is even more reliable thanks to a new protection filter; - The squeegee, which is able to turn up to 270°, is today even more practical thanks to its innovative pedal lift system, which allows to safely and practically lift it in any situation. Maximum functionality and performance which, together with its reduced dimensions and its long working time (unlimited in the hybrid version) make FR 15 the optimal solution for any kind of environment and surfaces, even the narrowest and least accessible ones.
